

IDEAL NETWORKS

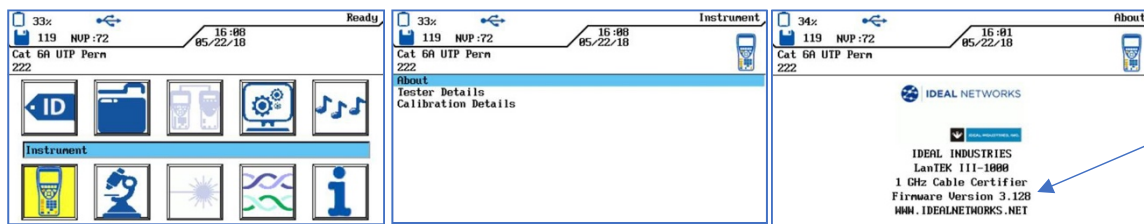

LanTEK III Series Software Release Note

Software Version: **3.217**

Release Date: 10 Sep 2021

Software version 3.117 or later must be installed on the LanTEK III before updating to version 3.217.

To check which version you have installed, select home screen, select Instrument then About to view the current version.

Current
Software
version

If the version is older than 3.117 then you must update to 3.117 before proceeding to update to 3.215. Unzip the “3_117_archive.zip” and follow the instruction in “3.117 installation.pdf” to install the 3.117 software.

This release note accompanies software version 3.217 of the LanTEK III Series cable certifier from IDEAL Networks. The following changes have been made from version 3.215:

- Rename Existing Cable Type names used in Copper/Fibre Standards
- Update Existing Cable Type Limits used in Fibre Standards
- Remove obsolete Cables Types in Copper/Fibre Standards
- Added IEEE Ethernet 2.5/5G Cable Types in Copper Standards
- Added Paige Datacom GameChanger Cable Types in Copper Standard
- Added CENELEC (EN) 50173 MM/SM Cable Type Limits in Fibre Standards
- Added TIA 568.3-D-1 Single-mode OS1/OS2 Cable Type Limits in Fibre Standards
- Updated TIA Cable Type DC Loop resistance limit Channel 20 to 25 db and Permanent link 20 to 21 dB.
